

Innovation In Action

**TELEDYNE
DEFENCE LIMITED**

A Teledyne Technologies Company

“Teledyne Defence Limited, of Shipley, West Yorkshire, has recently been awarded a contract through the UK MoD’s Centre for Defence Enterprise (CDE) to conduct a study into a Low Visibility Landing (LVL) solution for helicopters operating in ‘Brownout’ conditions. The contract has been awarded against a proposal submitted in mid-July 2008 to the CDE and resulted in a contract awarded on 18 August 2008 by the Defence Technology and Innovation Centre (the CDE’s parent organisation) and is due to complete in August 2009.

Teledyne Defence Limited is a Teledyne Technologies Company and is recognized for delivering complex microwave receiver subsystems, including Instantaneous Frequency Measurement (IFM) based subsystems, customized multi-function assemblies, digital signal processing and security systems; the company is developing the next generation non-cooperative image sensors.”
