

Teledyne Defence Limited (TDL), a wholly owned subsidiary of Teledyne Technologies Incorporated, has received a contract to supply PHOBOS-R Radar Warning Receivers (RWRs) to the New Zealand Defence Force. The RWRs will be used to complement the ESM currently fitted to the RNZN naval platforms.

PHOBOS-R is a compact size, weight & power and cost effective threat warning receiver system designed to minimise installation, training, operation, maintenance and life cycle costs of ESM systems. The PHOBOS family of Threat Warning and ESM systems includes options for enhanced performance, frequency extension, multiple port configuration and pulse analysis tools for real time and off line signal analysis.
